

**MODULE 1**

---

**Build A Political  
Terrain Map For Your  
Local Community  
And County**

**WELCOME TO**

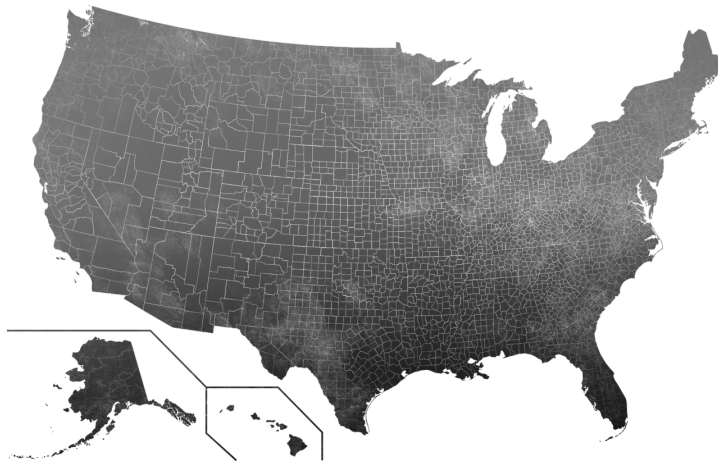

**County by County** is a grassroots, patriot-led movement founded in FAITH and KNOWLEDGE that utilizes peaceful, bold, and loud engagement actions on a local and county level with the intention of returning America to her Constitutional Republic origins and reclaiming our foundations of FAITH.

The goal of County by County is to create action groups in each of the 3,143 counties in the United States by building on an intimate knowledge of the political, cultural, economic, legal, educational, and informational realities that exist in the local areas we live. This provides the foundation for peaceful, targeted strategies and actions to return our Counties to the strong holds of sovereignty and Constitutional liberty.

## Understanding Your Political Terrain

Like any topographic map, we need to understand the terrain we are operating in to successfully move and maneuver. In a geographic sense, terrain gives us the physical aspects such as mountains, streams, valleys, draws, etc that determine how we prepare, what we need and how we maneuver.

In terms of politics, understanding how to prepare, what we need and how to maneuver are defined by the political terrain. Building this type of “map”

provides details of the environment defined by elected and appointed officials, direct hired public servants, lobbyists, and influencers that impact how are cities and counties operate. This includes everyone from the Sheriff and County commissioners, to Mayor and City Officials to public employees and campaign funders. In order for us to be successful, the details of our County and Cities that influence and shape the decisions are the starting point to build strategies and action plans.

## Building The Political Map

As part of building an informed movement, each person is asked to develop a Political Terrain Map for their local community and county. It is easy to read the data, it is an entirely another thing to research and assemble the data. The process of researching and assembling the data teaches each of us about the make-up of our communities, where to find the necessary information and identify critical gaps in knowledge that may prove essential down the road.

// COMMUNITY // RESEARCH // ASSEMBLE // IDENTIFY

Let's start with some quick facts:

- There are 3,143 counties or equivalent in the USA
- Texas has 254 counties, the most counties of any State
- Puerto Rico has municipalities rather than counties; there are 78 municipalities in Puerto Rico
- Louisiana has parishes instead of counties; there are 64 parishes in Louisiana
- New York City is a sui generis jurisdiction, with 5 boroughs that are treated like counties
- Alaska has no counties but has 19 organized boroughs and 11 census areas
- The District of Columbia is considered both a state-equivalent and a county-equivalent
- Connecticut abolished county government in 1960 and now has cities, towns and boroughs
- There are 100 county-equivalents in the territories of the United States

# MODULE 1

- NAME
- POSITION
- DUTIES
- CONTACT NUMBER
